Camden is committed to incorporating climate preparedness into their decision-making processes. This map highlights the results of a datadriven approach to highlight priority areas for green infrastructure investment that could provide multiple benefits needed to reduce the risk of flooding from stormwater, reduce the urban heat island effect, minimize impact from coastal and riverine flooding, and address vulnerability of at risk residents. This map was created by combining all the priorities that the decision support tool considers:

> Absorb: Addressing stormwater flooding challenges Cool: Mitigating urban heat islands Protect: Minimizing coastal and riverine flooding Equity: Supporting equity

Strategic green infrastructure investment

CLIMATE-SMART CITIES CAMDEN: OVERALL PRIORITIES
